1 **LASER ENGRAVING.**  
**PRECISION FOR  
TOMORROW.**

Laser engravings transform metal objects into jewelry. Silvery shine and matte metallic effects give your design a noble character. In laser engraving, the top layer of the metal is heated so intensely that it evaporates, revealing the material underneath. This results in a durable and sustainable product.

2 **CO<sub>2</sub>-LASER ENGRAVING.**  
**EVERY PACKAGING**  
**A UNIQUE PIECE.**

CO<sub>2</sub>-laser engraving highlights the unique character of wood grain, enticing the observer to touch the surface. A tactile experience for organic materials like beech or bamboo. Simple yet elegant, with a personalized touch.

**EMBOSSING.**  
**THE FINEST**  
**REFINEMENT.**

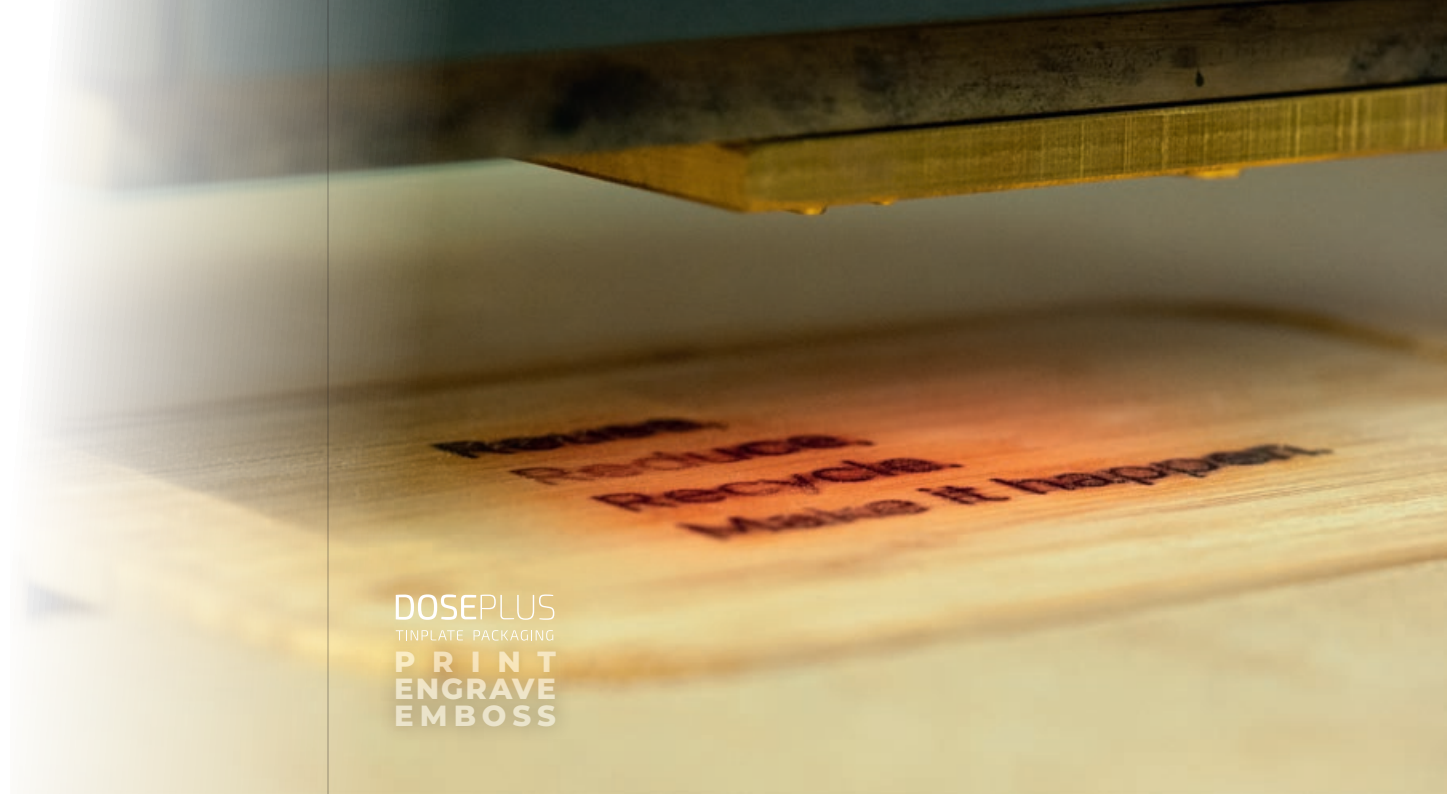

High value and quality, stability, and trust – no other finishing process conveys these qualities as effectively as embossing. One of the best ways to respectfully engage your customers. Our modern embossing process allows for the representation of even the finest lines and textures.

A close-up photograph of a textured, light-colored surface, possibly a metal tinplate, featuring the word "Städeli" embossed in a highly detailed, cursive script. The embossing creates a three-dimensional effect with visible ridges and shadows. The background is a soft, out-of-focus gradient of light to dark grey.

4 **BRANDING STAMP.**  
**HANDMADE FEEL.**

Traditional and handmade. Whether it's Grandma's secret recipe or a small declaration of love – embellishing wooden lids with the branding stamp or ,branding' imparts a very personal character to your packaging in a natural way. Each can looks a bit different.

5 **OFFSET PRINTING.**  
**THE CLASSIC THAT**  
**MAKES EVERYTHING**  
**POSSIBLE.**

For the full-surface printing of cans, we employ the classic offset printing. From photorealistic prints to complete color coverage, almost anything is possible. The ,all-rounder' adapts to all shapes and can be combined with embossing, laser engraving, as well as special colors. Offset printing is cost-effective for large quantities starting from 3000 pieces.

6 **DIGITAL PRINTING.**  
**FAST AND SHARP.**

Digital printing, our true multitasker, effortlessly enhances nearly every flat surface. In no time, we can produce high-quality, photorealistic prints right on-site. For even more impressive brilliance, we happily recommend using white as a background color.

7 **LABELING.**  
**COST-EFFECTIVE**  
**SOLUTION.**

The refinement with labels provides a versatile and cost-effective alternative to printing methods. Both flat surfaces and round cans can be labeled.

## 9 ADDITIONAL INFORMATION.

### QUANTITY, INDIVIDUAL SHAPES AND DESIGNS

Alle Veredelungen und eigene Designs produzieren wir ab 100 Stück. Kleinere Stückzahlen nach Absprache.

### SPECIFICATIONS FOR PRINT FILES

**The provision of data is not always an everyday process: Feel free to ask us.**

**We are happy to handle the printing data creation for you.** Please send us your printing data in vectorized form, such as a PDF or EPS file. For digital and

offset printing, pixel graphics like JPG or TIF files are also acceptable. Please ensure a recommended resolution of at least 300 dpi for these files. All data should be set in CMYK. We will contact you if there is an error. Before production begins, you will receive a proof for approval. Press proofs are optional.

### COSTS

The finishing costs depend on the size and complexity of the production. Additional expenses may arise, such as the creation

+49 (0) 3621 73380-0

of an embossing stamp. You will receive a transparent and non-binding offer from us.

### DELIVERY TIMES

Delivery takes place 2–3 weeks after production approval and subject to availability. Please note that due to force majeure, there may be changes to the schedule – we will inform you in advance.
